

FELLOWS

JÖRG TÖPFER GERMANY

Jörg Töpfer is a professor for Inorganic chemistry, glass and ceramics at the Ernst-Abbe-Hochschule, Jena, Germany.

He received a Diploma in Chemistry from Jena University in 1987, and a Ph.D. in Solid State Chemistry from the same university in 1992.

Jörg Töpfer became professor at the Ernst-Abbe-Hochschule Jena, Germany, in 2000. After several post-doctoral stays from 1996 to 1996 at the CNRS labs at the University of Bordeaux, France, at Cornell University, NY, USA, and at the University of Texas, TX, USA, he joined the Hermsdorf Institut of Technical Ceramics (now Fraunhofer IKTS Hermsdorf), Germany, as a group leader for magnetic materials in 1997.

He has published more than 166 technical papers and two patents. His research interests are focused on the chemistry and physics of oxides for functional ceramics, including magnetic, thermoelectric, semiconducting, and piezoelectric materials. Another topic of interest is the integration of functional materials into LTCC modules using co-firing strategies.

Jörg Töpfer is a member of the German Ceramic Society (DKG) and a member of the board of DKG since 2013. He is head of the DKG section electroceramics. He serves as member of the editorial board of the Journal of the European Ceramic Society since 2024.
